The Rodman Multi-Purpose Nibbler attachment is powered by any drill with a speed range of 1500 to 3000 rpm. The cutting head can be turned 360° to allow cutting in a forward, backward, or sideways motion. A punch moves up and down inside the die to make a 4mm or 5/32" wide cut. Cutting waste is disposed through an opening in the die.

The punch must be used in all four cutting positions of the die to get full use. Each punch can cut approximately 600 to 800 feet depending on the material. Turning the die 90° provides a fresh cutting surface on the punch.

APPLICATIONS

- ROOFING
- PLUMBING
- ELECTRICAL
- AUTOMOTIVE/MARINE
- HEATING/VENTILATION
- MAINTENANCE/REMODELING
- METAL CRAFT/DESIGNS
- COLLECTOR/HOBBYIST

SPECIFICATIONS

Power Source: Electric, Pneumatic or Cordless Drill with a speed range of 1500 to 3000 rpm.

Cut Width: 4mm or 5/32"

Maximum Recommended Gages

Stainless Steel	18 Gage
Mild Steel	16 Gage
Brass	14 Gage
Aluminum	14 Gage
Plastics	14 Gage
Fiberglass	14 Gage

Made in England

U.S. Patent No. 4,748,744

European Patent No. 0208493

U.K. Patent No. GB 2260926

NATO Stock No. 5130992998325
